

Dibcase Browser Print Setup

Mozilla Firefox Setup

To remove the footers and headers that may appear when printing from your browser, you must change the default settings in Firefox to those shown below. Select "blank" for all Headers and Footers to remove them from your printed documents.

Google Chrome Print Setup

To remove the footers and headers that may appear when printing from your browser, you must change the default settings in Chrome to those shown below. Select the “Print” button for your browser from the upper right menu option. Once you select the “Print” button, a “Print” window will appear.

Once the “Print” window appears, select the “More Settings” option to show additional configuration options. To remove the Headers and Footers from your printed documents, simply uncheck the “Headers and Footers” option.
